PROFILE

Front-end developer with 3 years of experience specializing in TypeScript, React, Next.js, and Sass. Passionate about performance optimization and building responsive, high-quality web applications. Focused on delivering well-structured and scalable solutions that enhance user experience.

PROFESSIONAL EXPERIENCE

03/2025 – 09/2025   **Front-End and mobile developer**
Montra
- Led frontend software development (FSD) with a strong emphasis on scalable architecture, building modern websites, dashboards, and cross-platform mobile apps using React.js, Next.js, and React Native.
- Collaborated closely with designers and backend developers to deliver seamless user experiences and maintain consistent branding across platforms.

01/2021 – Present   **Discord**
Community Manager
- Coordinated community events, workshops, and outreach initiatives to improve public engagement.
- Acted as a liaison between the organisation and local stakeholders, fostering positive relationships.
- Managed internal and external communications, including newsletters, social media content, and updates.
- Designed promotional materials (digital banners) to support campaigns and increase visibility.
- Monitored the impact of programs and submitted regular progress reports to senior management.

12/2022 – Present
Benin city, Nigeria   **Front-End and Mobile developer**
Lasisi Tech Hub
- Collaborate with designers and back-end developers to implement wireframes and mockups into functional interfaces.
- Optimized website performance, reducing load times by 30%.
- Maintained version control using Git and contributed to agile development processes.

09/2024 – 03/2025
Fct, Nigeria   **Freelance Front-End Developer**
Self-Employed
- Developed custom websites, dashboards, and web applications for clients across various industries.
- Implemented responsive designs using React.js, Next.js
- Achieved a 95% client satisfaction rate through timely delivery and effective communication.

EDUCATION

09/2019 – 06/2023   **Bachelor's Degree**
University of Benin
Computer Science
- GPA: 3.41/5

SKILLS

Languages
JavaScript (ES6+), TypeScript, HTML5, CSS3, SQL

Soft Skills
Problem-solving, teamwork, communication

Tools
Git, Webpack, Jest, Figma, Cypress, Prettier, Eslint,
Husky, Storybook.

Libraries
Redux, Zustand, React Query, SWR, Zod, Tailwind
CSS, Sass, React Hook Form.

Frameworks
React, Next.js, Expo React Native, Nest.js, Postgress

PROJECTS

elvisceramicsenterprises.com.ng
Ecommerce projects
Technologies: React.js, Next.js, Zustand, Redux, Tailwind CSS, FSD
- Developed a fully responsive e-commerce platform using React.js and Next.js for enhanced performance.
- Implemented Redux for efficient state management of cart items, user sessions, and product data.
- Designed a modern and intuitive UI with Tailwind CSS, ensuring a seamless shopping experience.
- Optimized SEO and usability, resulting in a 20% increase in online sales within three months.

Jule.ai
SaaS feedback management platform with embeddable widgets
Technologies: Next.js 15, React 19, TypeScript, NestJS, PostgreSQL, Tailwind CSS, React Query, Zod
- Developed a full-stack multi-tenant SaaS platform with embeddable widget system, real-time analytics dashboards, and workspace management using Next.js 15 and NestJS with PostgreSQL.
- Implemented Feature-Sliced Design (FSD) architecture ensuring scalable, maintainable codebase with clear separation of entities, features, and widgets layers.
- Built comprehensive features including authentication flows, visual customization tools, third-party API integrations (Iterable), project configuration editor, and role-based access control.

Evently app
Mobile and telegram mini app
Technologies: Next.js, Expo-React-Native, Maplibre, React-hook-form, Zod
- Built the Evently event sharing app and a Telegram Mini App using React Native, Maplibre for interactive maps, and Zod for robust schema validation.
- Applied modular and scalable frontend architecture practices, enabling code reusability and future extensibility across components and views.

DLP System
Front-End Development | Technologies: React.js, Next.js, Redux, RESTful APIs, SCSS
- Developed a web-based tracking system for monitoring and analyzing operational data in real-time.
- Implemented Redux for efficient state management to handle complex data flows and user interactions.
- Built reusable components with React to ensure scalability and maintainability.
- Integrated RESTful APIs to fetch and update data seamlessly across multiple modules.
- Optimized performance using Next.js features like server-side rendering and dynamic imports.
- Enhanced usability with intuitive UI/UX design and responsive layouts for various devices.
